Pfeiffer uWrite Gel Royal Blue, 1 Pen + Pack of 2 Refills Bundle

PFHG900

Meet the Pfeiffer uWrite Gel Pen - the first in the world of its kind. Good for the environment, and good for you, the uWrite is completely metal-free, with the groundbreaking combination of a 100% non-toxic ball made from medical-grade ceramic, housed in a polymer tip. The ball has a diameter of 0.7mm, and produces a 0.4mm line width.

Plus, with the ability to slip in a Pfeiffer refill, you'll be doing your part to help our planet. Each year, the tips of disposable pens add thousands of kilograms of toxins like lead, brass, nickel and stainless steel (as well as associated plastic components) into landfill- and eventually our waterways. Our refill is even made from a single class of plastic to make recycling easier.

Now when your uWrite Gel Pen eventually runs out, all you need to do is just slip in a Pfeiffer refill, and you'll have a brand new pen. The only things you'll be throwing away are your old habits!

Package Contents

- 1 Pen
- 2 Refills
